

BSK5 HYALURONIC ACID 3%

HYDRATING & REGENERATION SOLUTION

¿QUÉ ES?

BSK5 HYALURONIC ACID 3% is a professional skin care solution for facial treatments. Rejuvenation and firming of the skin.

Ideal for aging, tired skin that has lost volume with fine lines and wrinkles.

Each vial contains 150 mg of hyaluronic acid of three molecular weights, a biotechnological ingredient with higher efficacy compared to hyaluronates, in:

- Penetration
- Wrinkle reduction
- Transepidermal water loss
- Skin smoothing
- Hydration

It doesn't focus on a specific molecular weight but on the efficacy of a range of fractions working in synergy, as found naturally in the body.

PRESENTATION

5 Vial x 5 ml / 0.35 Fl. Oz.

USE

Facial rejuvenation, sagging skin, wrinkle reduction

INGREDIENTS

· Hyaluronic Acid 3%

BENEFITS

Moisture retention, increased viscosity and reduced permeability of extracellular fluid, improved mechanical resilience, improved tissue repair, soothes the skin, helps increase skin firmness and elasticity, improves tissue-supporting fibers and reduces the appearance of fine lines and wrinkles, promoting youthfulness.
