

BSK71 C+E VITAMIN GEL CREAM

ANTI-AGING CREAM WITH VITAMIN C+E

¿QUÉ ES?

BSK71 C+E VITAMIN GEL CREAM is a product formulated with Vitamin C (in the form of stabilized natural extract) and Vitamin E incorporated into a new excipient base called cremagel, which is characterized by its non-greasy texture. It contains large amounts of natural Vitamin C together with essential oils and pectins from the orange, which constitute a real natural protective capsule of Vitamin C against oxidation and bacterial contamination. The extract also contains other vitamins from the orange: vitamins A, B1, B2, B5, B6, H and PP, as well as amino acids and sugars from the pulp.

Vitamin C is a very labile active ingredient that, in order to maintain its effectiveness, must retain its properties in the cosmetic product it is incorporated into. Therefore, in our laboratory we have selected an extract from Calabrian orange (*Citrus aurantium*), an orange particularly rich in Vitamin C that is harvested at full maturity between the months of December and April.

This gel cream brightens and evens skin tone and combats the symptoms of skin damaged by sun rays, stress and the passage of time. The cream gel is not greasy and is perfectly absorbed, leaving a fresh and moisturizing sensation on the skin. For an anti-aging treatment, the C+E VITAMIN GEL CREAM can be combined with our Multivitamin Serum with Proteoglycans to enhance its results.

PRESENTATION

- Cremagel 50 ml
- Professional Format: 50ml

USE

- Facial
- For combination, oily or acne-prone skin

INGREDIENTS

- Vitamin C
- Vitamin E

ACTION

- Antioxidante
- Anti-age
- Antiradicalar
