

BSK74 MULTIVITAMIN SERUM

BRIGHTENING WITH VIT. & PROTEOGLYCANS

¿QUÉ ES?

The main components of the multivitamin serum are vitamin C, E and F, reinforced with the moisturizing action of proteoglycans. The synergy of these ingredients brings radiance to the skin and improves its appearance.

A multi-vitamin regenerating serum, non-comedogenic and with great penetrating power. As a carrier of all these components, propylene glycol has been incorporated into the formula, one of the most effective excipients that allows the penetration of the active ingredients into the skin.

It has super moisturizing, repairing and firming properties.

It is indicated for mature and dull skins, with signs of fatigue or with pigmentation or texture irregularities and for atopic skins with dryness and eczema problems. Indicated for normal, dry and very dry skin.

PRESENTATION

- Serum 30ml
- Professional Format: 30ml

USE

- Facial
- For normal and dry skin; dull skin

INGREDIENTS

- Vitamin C
- Vitamin E
- Vitamin F
- Proteoglicanos
