

BSK9 HAIRPRO HAIR REVITALIZING SOLUTION

WHAT IS IT?

BSK9 HAIRPRO solution nourishes and stimulates hair follicles for healthy hair growth and can help protect against androgenic alopecia, androgenic areata and telogen effluvium. It is a professional hair care solution.

The main active ingredient of this hair nutrition solution is the concentrated secretome of stem cells from Curcuma longa rhizome. This secretome contains Exosomes, which the cells use to communicate with each other. It is also rich in signaling peptides specially focused on creating the optimal microenvironment to reactivate the hair cycle.

It contains exosomes rich in trace elements, essential amino acids, vitamins, phyto-peptide fractions, containing growth factors, transcription factors and epigenetic factors.

In one vial of BSK9 we have **5.49 x 10³ million stable exosomes**, which are released during product application.

It also contains Ginkgo Biloba which stimulates microcirculation. Reinforced with Cegaba, an amino acid that stimulates cell growth and proliferation. And Vit-Complex 1 which contains numerous vitamins such as biotin, niacinamide and riboflavin, which have a soothing and antioxidant effect and help hair growth.

PRESENTATION

5 Vials x 10 ml / 0.35 Fl. Oz.
