

BSK14 TRANEX PRO DEPIGMENTING SOLUTION

WHAT IS IT?

Skin care solution with tranexamic acid, kojic acid, ascorbic acid (vitamin C), nicotinamide, rutin and hyaluronic acid of high, medium and low molecular weight, with moisturizing and depigmenting action.

The formulation of BSK 14 has been reinforced with kojic acid and vitamin C for enhanced antioxidant action, significantly reducing hyperpigmentation. Formulated with hyaluronic acid, with moisturizing activity, increased elasticity and activation of collagen and elastin production due to its low molecular weight fraction.

Vitamins that strengthen and restructure the dermal layer have been used for rapid recovery after treatment. To prolong the effects of the treatment, it is recommended to use BSK76 Serum and BSK70 Depigmenting Cream.

PRESENTATION

5 Vials x 5 ml / 0.175 Fl. Oz.

USE

- Topical use
- Facial and hand product

INGREDIENTS

- Tranexamic acid
- Ascorbic acid
- Sodium hyaluronate
- Kojic acid
- Niacinamide
- Glutathione
- Troxerutin

ACTION

- Depigmenting
- Evens skin tone
- Anti-aging
- Antioxidant

IMAGEN DEL PRODUCTO

Preserve between 5°C -25°C. Keep out of children's reach. Avoid contact with eyes and mucous membranes. Suspend its use if there is allergy, sensitivity or hipersensitivity to the product.

Cosmetic product. Topical use. Not injectable. Professional use.
