

BSK3 BOTOPEPTIDES

SMOOTHING WRINKLES SOLUTION

¿QUÉ ES?

BSK3 BOTOPEPTIDES is a professional treatment solution that targets expression lines and deep wrinkles caused by muscle contraction. These tend to perpetuate and worsen as time goes on, as our facial expressions are natural and continuous.

Although we want to diminish facial lines, facial expression is not something we really want to lose completely.

BOTOPEPTIDES is a cosmeceutical solution that includes state-of-the-art peptides.

These peptides compete with natural proteins to position themselves in the SNARE complex, which is destabilized. As a result, neuronal excitability and muscle contraction are reduced. In addition, a new pentapeptide mimics the natural pathway of enkephalins and also acts on the formation of expression wrinkles.

It's a skin care solution for professional use.

PRESENTATION

5 Vials x 10 ml / 0.35 Fl. Oz.

USE

Expression lines and wrinkles - facial.

INGREDIENTS

- Snap8
- Leuphasyl

BENEFITS

It smoothes the skin and reduces fine lines and wrinkles caused by facial muscle contractions, but gives a very natural looking result.
