## PROFESSIONAL TREATMENT

1. Deep cleansing of the skin prior to treatment.
2. Apply **BSK84** of 2-5 ml of product depending on the area to be treated. Apply using the brush and leave on for 10 - 20 minutes. The application time depends on the area and the patient's skin type. Neutralize with BSK88. Apply once a week or according to the professional's criteria.

Neutralize with BSK88. Apply once a week or at the discretion of the professional.

3. Apply **BSK34** forming a layer of about 3-5mm with the brush on the area to be treated, massaging lightly until completely absorbed. Leave it on for 15 - 20 minutes. Remove with a damp gauze. Suitable for use in appliance techniques.

Once BSK34 has been applied, apply BSK93 Post-Meso Cream.

4. Use **BSK94** at home, twice a day on the treated area until the next treatment. Apply with a light massage on the areas to be treated, insisting on the most critical areas. Let it absorb by itself.

In case of redness, it is recommended to apply a layer of BSK93 Post-Meso Cream and leave it on for 10 to 15 minutes. After that, BSK94 can be applied.
